INDEX TO VOLUME 43

Abnormalities of incisor teeth of thyroparathyroidectomized rats, 983*
Abrams, E. J., 869†
Abrasion
  brush angle, and simulated gingival margin cleaning in reciprocation action automatic toothbrushing, 800†
  gingival, effects of electric toothbrush types on induction of, 794†
  toothbrushing on acrylic resin veneer surfaces, 800†
Abscess-formation by *Nocardia dentocariosus*, 904†
Absorption spectra and ionization constants of allyl and propenyl compounds related to eugenol, 915†
Abstracts
  Australian Section, 975
  British Division, 945
  42d General Annual Meeting, 744
  Japanese Division, 936
  New Zealand Section, 982
  titles of North American Division, 987
Abutment castings and preparations, bridge, evaluation of retention using tension testing methods, 919†
Accumulation of free sialic acid in the mixture of whole saliva and sugar, 1258‡
Acetate
  cellulose, filter implants, regeneration of alveolar bone beneath, 827†
  lead, as marker of growing calcified tissues, 776†
Acid
  and alkaline phosphatases in periodontal structures of rat and mouse, histochemical detection of, 459‡
  ascorbic, ultrastructure modification of connective tissue of dental pulp in animals deficient in, 987§
  buffers, mechanism of enamel demineralization in, 987§
  buffers, mechanisms of enamel dissolution in, 868†
  dissolution rate of sound and white spot enamel treated with tin (II) and fluoride compounds, 867†, 989§
  fluoride phosphate solutions, acquisition of fluoride by enamel from, 869†
  leaching technique used in obtaining measurements of I-131 penetration, 175
  mucopolysaccharide in normal and diabetic gingival specimens, histochemical analysis of, 875†
  solubility, rat molar, after treatment with fluoride, 867†
Acini, rat submaxillary gland, secretory canaliculi of, 853†
Aconitase
  activity in periodontal tissues, 495
  and fumarase activity in periodontal tissues, 942*
Acridine orange, histochemical demonstration of gingival mucopolysaccharides with, 819†
Acrylic
  fillings crazing, relation to inserting, finishing, and polishing techniques, 187, 941*
  resin veneer surfaces, toothbrushing abrasion on, 800†
Actinomycetales, cell wall analysis of, 891†
Actinomycetes and bacteria, similarity of, 964*
Actinomycetes cell walls, amino acid composition of, 991§
Activation analysis
  determination of carbon distribution in dental enamel by, 958*
  trace element determination by nuclear reactions, 992§
Acute necrotizing ulcerative gingivitis, ultrastructural characteristics of spirochete in ulcerated lesion of, 793†
Adachi, M., 942*
Adams, A. B., 744†, 989§
Adams, S. H., II, 837†, 872†
Addington, L., 910†
Adhesives used with polysulfide impression materials, 951*
Adler, H., 888†
Adolescent girls, interrelations of face dimensions to selected body measurements in, 820†
Aduss, H., 821†
Aeromicrobiology of dental handpieces, 903†, 989§
African lymphoma in tropical Central America, search for, 897†, 991§
Agar replica method for caries prediction in children, 988§
Agar replica method for evaluating bactericidal effect of mouthwashes, 745†
Age
  changes of vascular architecture of human dental pulp, 804†
  influence on position of epithelial attachment in gnotobiotic rat, 833†
  patient, and tooth site, patterns of anterior tooth treatment in relation to, 802†
  of teeth, degree of etching as function of, 629‡
Aging effects in blood vessels, 718‡
Agris, J., 888†
Ah Moo, E. W., 771†, 993§
Air-rotor drill noise, hearing threshold level of dentists exposed to, 962*
Aitken, H. N., 982*
Akiyama, T., 942*
Akiyoshi, M., 936*
Aleo, J. J., 818†
Alginate impression materials, characterization of setting process in, 107
Alimentary phosphate changes and feeding, 909†
Alizarin staining, facts and fallacies of, 814†
Alkaline
  and acid phosphatases in periodontal structures of rat and mouse, histochemical detection of, 459‡

* Abstracts. † IADR Abstracts. ‡ Annotations. § Titles.

Alkaline—*Continued*
phosphatase activity in developing molars of vitamin D–deficient rats, 71
solution, decrease of effect of stannous fluoride on enamel solubility with, 937*
ALLAN, F. C., 924†
ALLEN, K. R., 821†
ALLEN, P. Z., 892†
Alloplasts in crane mandible, evaluation of synthetic materials as, 987§
Alloy
amalgams, powder and tablet, comparison, 951*
chromium-cobalt, effect of heat treatment on hardness of, 918†
lingual connectors' strain during function, 949*
silver-tin, X-ray diffraction of strain-relief in, 924†
studies, base-metal, injection casting technique for, 918†
Alloy-mercury ratio and condensation, effect on adaptation of amalgam, 922†
Alloys
casting, fit using different investing materials and techniques, 916†
gold, tensile specimen design for casting, 918†
heat treatment for fused-porcelain technique, 927†, 993§
ALLRED, H., 971*
Allyl and propenyl compounds related to eugenol, ionization constants and absorption spectra of, 915†
α-amylase, immunochemical studies on, 892†
ALTON, A., 749†
Alveolar
attachment, tooth, in mouse periodontium, 787†
bone and cementum, microradiographic study of, 936*
bone growth and tooth eruption, analysis utilizing tetracycline fluorescence, 887†
bone growth and tooth eruption, collagen maturation role in, 947*
bone regeneration beneath cellulose acetate filter implants, 827†
Alveolar crest, excision to, gingivectomy, 791†
Amalgam
cavity design, clinical evaluation of, 921†
effect of mercury/alloy ratio and condensation on adaptation of, 922†
expansion, transversal and early measurement of, 194
hardness, effect of composition and overheating on, 923†
interfaces, mercury at, 922†
marginal penetration studied with Ca^{45}, 804†
microstructure of, 924
properties during hardening, 923†
restorations, Prednisolone used as a cavity liner under, 925†
strength, effect of mechanical amalgamation on, 263
transverse strength of, 121
Amalgamation, mechanical, effect on amalgam strength, 263
Amalgams silver-tin, resistivity of, 501
AMDUR, B. H., 767†, 864†, 871†, 1168
AMEMIYA, A., 936*
Amino-acid analyses
of denture pellicle, 302‡
of glycoprotein-containing component of saliva, 302‡
Amino acid composition of actinomycetes cell walls, 991§
Amylase inhibitor action, 1260‡
Anabolic agents, biopharmacology of, 229
Anaerobiosis, continued, 991§
Anatomy, functional, of the TMJ, 993§
ANDERSON, D., 992§
ANDERSON, D. J., 871†
ANDERSON, D. L., 748†
ANDERSON, D. M., 922
ANDERSON, J. N., 920†
ANDERSON, J. R., JR., 913†
ANDERSON, V. E., 900†
Anemias, stomatological manifestations of human nutritional, 991§
Anomalies
cleft palate and related, 991§
congenital dental, incidence in ages six to nine, 802†
congenital otocephalic, in man and animals, 821†
dental, and retained deciduous teeth, 772†
Anterior tooth treatment, patterns in relation to tooth site and patient age, 802†
Antibacterial factor in human parotid saliva, isolation and identification of, 883†
Antibiotic effect on dental calculi formation in cats, 989§
Antibiotics, tetracycline, and tooth discoloration, 780†
Anticaries
agents effectiveness in rats using an incipient carious lesion method, 989§
agents in rats, effectiveness of, 859†
Anticoagulation therapy, prolonged thromboplastic activity of human saliva in patients under, 323
Antifungal evaluation of a new endodontic antiseptic, 749†
Anti-inflammatory effect of proteolytic enzymes, mechanisms for, 873†
Antilactobacillus factor, salivary, effect of growth medium on demonstration of, 744†
Antiseptic, endodontic, antifungal evaluation of a new, 749†
ANNONI, J. D., 151‡, 759†
Announcement of abstract submissions for 43d IADR Meeting, 639
Aortic calcification, role of matrix in inducing, 753†
Apatite, infrared investigation of carbonate substitution in, 750†
Apatites
effect of ions on unit cell dimensions and crystallinity of, 775†
synthetic and biological, uptake of tetracycline by, 961*
Aphthae lesions, recurrent, transitional L-form isolated from, 903†
Aphthous ulcers of the mouth, genetic concept of, 832†
Apical cuticular structure, comparative histologic study, 788†
APLIN, A. W., 923†

* Abstracts. † IADR Abstracts. ‡ Annotations. § Titles.

Applicator, vinyl, for assessing drugs in caries and periodontal disease treatment of hamster, 152‡
APONTE, R., 829†
APOSTOLOPOULOS, A. X., 766†
APPLETON, J. H., 193†
ARAN, A. P., 859†
ARAYA, S., 938*, 940*
Arborization, human salivary, patterns of, 630‡
Arch, dental, asymmetry, analysis of, 780†
ARCHER, F. L., 809†
ARGENTAR, H., 915†
ARITA, J., 939*
ARMSTRONG, W. D., 1002, 1196
ARMSTRONG, W. G., 1002
Army, U.S., preventive dentistry program, evaluation of, 901†
ARNIM, S. S., 697
Artificial deformation and craniofacial asymmetry in ancient Peruvians, 353
Ascorbic acid
  deficiency, oral healing in, 854†
  supplementation, modification of effects of hyperthyroidism by, 854†
Ascorbic acid-deficient animals, ultrastructure modification of connective tissue of dental pulp in, 987§
ASGAR, K., 921†, 924†
ASH, M. M., 801†
Ash in subgingival calculus, 645
Assessing drugs in treatment of hamster caries and periodontal disease, vinyl applicator for, 152‡
ASTROM, A., 619
Asymmetry, dental arch, analysis of, 780†
Asymptotic exponential model, use for describing progress of dental decay, 783†
ATHERTON, J. D., 968*
ATP determinations in pulp tissue, 991§
Audio analgesia, psychological control of dental pain with, 979*
AUSTIN, J. E., 798†
Australian Section abstracts, 975
Autogenous epithelial transplantation, induction of lymphoepithelial lesions in hamsters by, 894†
Autonomic nervous regulation, synergistic, of accelerated salivary-gland growth, 881†
Autoradiographic
  studies of initial cellular response to injury on mouse gingiva, 939*
  study under hypothyroid conditions of cell activity during tooth movement, 830†
AVERILL, H. M., 1150
AVERY, J. K., 822†, 842†, 852†, 987§
AYERS, H. D., 922†
Azo group, dyes of, vital staining of bone with, 774†

Bacilli, Gram-positive, isolation from deep dentinal caries, 846†
Bacteremia following exodontia, prophylaxis, and gingivectomy, 877†
Bacteria
  associated with teeth in rats, comparison of two methods of quantitative determinations of, 717‡
  filamentous oral, and hamster periodontal disease, relation between, 902†
  oral, calcification by, 837†
  related, and actinomycetes, similarity of, 964*
Bacterial
  aerosols generated by high-speed dental handpieces, 993§
  cell mats, cariotron chamber for diffusion through, 746†
Bactericidal effect of mouthwashes, agar replica method for evaluating, 745†
Bacteriology of dental caries, 1021
Bacteriophage isolation from a strain of oral enterococcus, 991§
Bacteriophages, isolation from oral enterococci, 772†
Bacteriostatic activity of endodontic therapeutic agents, 744†
Bacteroides, taxonomy of predominant cultivable oral, 890†
Bacteroides melaninogenicus, collagenase role in mixed infections containing, 747†
BADAMO, D. J., 912†
BADEN, E., 310†, 795†, 874†
BAER, P. N., 874†
BAGDADE, A. D., 905†
BAHN, A. N., 744†, 745†, 889†, 903†, 988§
BAILEY, H. S., 229
BALDWIN, D. C., JR., 826†
BANEZ, L. O., 850†
BANKS, S. O., JR., 798†
BARBER, C. G., 758†
BARBER, D., 375
BARENS, G., 903†
BARILE, M. F., 903†
BARNES, L., 826†
BARNHART, G. W., 118, 628‡
BARON, H. J., 744†
BARR, C. E., 26, 854†
BARRINGTON, E. P., 884†
BARTELS, H. A., 136, 745†
BARTTER, F. C., 1098
Bases, denture, effect of composition on dimensional stability of, 913†
BATES, J. F., 949*
BAUGH, D., 886†, 1187
BAUM, L., 921†
BAUMHAMMERS, A., 819†
BAVETTA, L. A., 839†
BAWDEN, J. W., 563, 678, 884†
Beagle-hound colony, radiographic assessment of periodontal disease in, 878†
Beagles, Ra-226, Ra-228, or Th-228 induced gingival ulceration in, 35
BECK, D. J., 304†, 982*
BECKER, R., 323
Behavior
  changes in the child dental patient, 989§
  of rat molar cementum in experimental periapical lesions, 988§
BEKESI, E., 858†
BELL, W. H., 828†
BELLONE, R., 874†
BENCH, R. W., 755†
BENNETT, C. G., 804†
BENNETT, I. C., 990§
BENNETT, J. S., 817†, 990§
BENNETT, W. L., 772†
BERGER, N. D., 3

Bernick, S., 406, 812†
Bernier, J. L., 372†
Beryllium, radioactive, uptake in rat tissues and teeth, 346
Besic, F. C., 606, 630‡
Bevan, E. M., 979*
Bevelander, G., 752†
Beveridge, E., 805†, 990§
Bhalla, L. R., 917†
Bhaskar S. N., 896†
Bhatia, H. L., 753†, 991§
Bhussry, B. R., 849†, 870†
Bibby, B. G., 863†, 1150
Bickley, H. C., 840†
Bicuspid eruption, effect of premature extraction of deciduous molars on, 992§
Biddington, W. R., 804†
Biggerstaff, R. H., 755†
Bilotti, A., 886†
Biochemical adaptation to fluoride by a microorganism isolated from dental plaque, 946*
Biochemical studies in periodontal disease, 988§
Biochemistry of phosphates, 1065
Biopharmacology of anabolic agents, effect of Norethandrolone on rat experimental dental caries, 229
Bird, J. T., 760†
Bishop, J. G., 708, 907†, 909†
Biswell, H. A., 380
Bixler, D., 784†
Björk, A., 353
Björk, L., 353
Blackey, W. E., 758†
Blackledge, G. T., 754†, 839†
Blackwood, H. J. J., 970*
Blanden, R. V., 980*
Blastema, regenerate in the newt, histogenesis of, 759†
Blayney, J. R., 862†
Blechman, H., 136, 745†
Bleeding rate as an indication of tooth pulp blood flow, 991§
Bleeding tooth drugs, and mandibular nerve section, 908†
Block, A., 886†
Block sections and their use in periodontal pathology, 993§
Blood
  clotting, role of factor V in, 888†, 993§
  coagulation, role of salivary factor VII in, 882†
  flow in dental pulp. 804†
  flow to mandibular area, effect of stimulation of peripheral mandibular nerve on, 907†
  pressure, systemic arterial, and dental pulp tissue pressure, relation between, 805†
  supply and innervation of teeth, periodontium, and TMJ of guinea pigs, 812†
  supply of TMJ, 224
  types and dental caries experience, 776†
  vessels, aging effects in, 718‡
  volume changes during menstruation, 994§
Blood-group substance concentration in parotid, sublingual, and submaxillary salivas, 272
Blood-serum phosphorus and salivary calculus, relation between, 838†
Bodnarchuk, A., 802†
Body measurements, selected in preadolescent and adolescent girls, interrelations of face dimensions to, 820†
Boehne, J. W., 1107
Bolden, T. E., 839†
Bond strength of dental porcelain fused to metal, 927†, 993§
Bone
  and bone substitutes, histologic study of intramuscular implants of, 828†
  cells, effect of parathyroid hormone on, 975*
  developing in calf, lipids in, 814†
  formation, intramembranous, electron-microscopic observations on, 851†
  formation, supracortical, 827†
  fragment, spacing of, effect of healing, 828†, 993§
  frozen undecalcified serial sections of, 973*
  growth, alveolar, and tooth eruption, analysis utilizing tetracycline fluorescence, 887†
  growth, alveolar, and tooth eruption, collagen maturation role in, 947*
  growth, effect of locally applied heat on, 758†
  growth with consideration of *Lamina dura*, 987§
  healing rate after defects produced by rotary instruments, 207
  high density fraction of, vitamin-D deficiency on the, 957*
  implantation, osteogenic activity following, 26
  implants and altered collagens, connective-tissue response to, 809†
  induction in vivo across millipore filters by mouse odontogenic tissues, 829†
  marrow transplants, hemopoietic, effect on healing of maxillofacial osseous defects, 827†
  mineral, crystal chemistry of hydroxyapatite relation to, 750†
  protein, fluorometric demonstration of tryptophan in, 276
  reaction to mucogingival surgery, 994§
  resorption induced by parathyroid extract, biochemical aspects of, 841†
  resorption in maxilla, mandible, and femur of the *ia* strain of rats, 812†
  resorption in tissue culture, parathyroid extract-induced, enhancement by heparin, 830†
  substitute plaster of paris in dog, 754†
  and teeth, undecalcified, preparation of large specimens of, for sectioning at a 4-μ thickness, 131
  vital staining with dyes of Azo group, 774†
Bony defects, repair of, following implantation of polyvinyl alcohol sponge, 476
Boucher, L. J., 993§
Bovine dental pulp, dipeptidase activity in, 806†, 989§
Bovine teeth, coronal cementum in, 788†
Bowden, G. H., 973*
Bowen, R. L., 920†
Bowen, W. H., 965*
Bowman, L. M., 836†
Boyd, R. N., III, 920†
Boyde, A., 959*
Boyer, C. C., 224
Boyne, P. J., 827†
Braden, M., 107, 315
Bradley, R. E., 816†, 875†
Bradshaw, A. R., 961*

BRAIN, E. B., 971*
Brain-damaged and normal children, defects in teeth of, 897†
BRÄNNSTRÖM, M., 619
Branchial cyst, histogenesis of, 772†
BRANDTZAEG, P., 790†
BRANT, J. W. A., 820†
BRAUER, G. M., 281, 915†, 921†
BRAZIER, I. L., 993§
BRENMAN, H. S., 905†
Bridge
  abutment castings and preparations, evaluation of retention using tensional testing methods, 919†
  pontic materials, rat connective-tissue response to, 899†
  retainers, tensional testing methods applied to evaluation of retention of, 987§
BRINER, W. W., 774† 987§
BRINSDEN, G. I., 911†
British Division Abstracts, 945

CADELL, P. B., 982*
CAGAN, R. S., 922†
CAHAN, L. R., 797†
Calcification
  aortic, role of matrix in inducing, 753†
  effect of hypercitricemia on, 778†
  initial, of human first permanent molar, 897†
  by oral bacteria, 837†, 989§
  of reconstituted collagen fibrils in vitro, fibrillar structure and free amino groups in the, 960*
  of salivary proteins, 871†
Calcified tissues
  growing, lead acetate as marker of, 776†
  lipid components of, 841†
  phosphorescence of, 775†
Calciphylaxis, reduction of effect of chronic dihydrotachysterol overdosage on periodontium by, 790†
Calcium
  acid phosphate effect on dental caries in children: A controlled clinical trial, 1144
  content, salivary gland, effect of parathyroidectomy on, 879†
  deficiency, in rats, Ca^{45} distribution during pregnancy under conditions of, 563
  in developing enamel, X-ray emission microanalysis of, 959*
  fate in calcium hydroxide dressings placed over exposed dental pulps on rhesus monkeys, 900†
  fluoride in enamel, determination of, 960*
  and Mg state in saliva, 976*
  origin, in repair wall after pulp exposure in dog, 641
  phosphate effect on dental caries in school children, 1137
  phosphate solutions, factors influencing enamel rehardening characteristics of, 885†
  phosphates, magnesium effect on, 751†
  phosphorus, and magnesium, dietary supplements of, effect on growth and caries, 986*
  phosphorus diet, high ratio, 71
  phosphorus product for nucleation and crystal growth, 750†
  to phosphorus ratio in foods and diets, metabolic significance of the, 1090
  phosphorus and vitamin D deficiency effects on dentin of young and mature rats, 961*
  protection on osteoporosis in rats fed a cariogenic wheat flour ration, 992§
  soluble, analysis of saliva for, 457‡
  solutions and remineralization of calculus matrices, factors influencing stability of, 749*
  in subgingival calculus, 645
  and vitamin-D deficiency effect on food intake of the rat, 957*
$Calcium^{45}$
  distribution during pregnancy under conditions of calcium deficiency in rats, 563
  extraction from teeth, procedure of, 1253‡
  marginal penetration of amalgam studied with, 804†
  maternally stored, placental transfer to fetal oral tissue, 848†
Calculi
  dental, effect of micro-organisms on formation in cats, 837†
  formation in cats, antibiotic effects on, 989§

Calculus
assessment, in vivo, new method, 837†
composition, subgingival, 645
formation and salivary respiration (QO_2), relation between, 838†
matrices, remineralization of factors influencing stability of calcium and phosphate solutions and, 749†
salivary, and blood-serum phosphorus, relation between, 838†
salivary, and mineralized tissues, spectroscopic analysis by optical maser of, 836†
supragingival, lipids of, 836†
CALDERWOOD, R. G., 207
CALDWELL, R. R., 765†
Calf bone, lipids in developing, 814†
CALHOUN, N. R., 754†
CAMELLERIA, G. E., 966*
CAMERON, D. A., 975*
CAMPBELL, M. J. A., 977*
Canaliculi, secretory, of rat submaxillary gland acini, 853†
Cancer, caries, and coronary disease, relationship of, 988§, 993§
Candida albicans, occurrence in oral cavity of diabetics, 903†
Candida, yeast and mycelial phases of, in oral infections, 951*
Candidiasis, acute and chronic, pathology of, 952*
Canis familiaris, variations of oral pigmentation in, 839†
CANTWELL, K. R., 923†
Carbide bur design, 924†
Carbohydrate
accumulation in salivary sediment, effect of fluoride on, 843†
in pus and exudate from gingival pockets, 938*
storage by salivary sediment, effect of glucose concentration on, 842†
Carbon
clearance studies of reticulo-endothelial system development in fetal rats, 980*
distribution in dental enamel, determination by activation analysis, 958*
Carbonate
and fluoride relationship in human dentin, 866†
substitution in apatite, infrared investigation of the, 750†
CARBONE, D. F., 768†
CARBONELL, V. M., 798†, 834†
Carboxylic acids, reactions of zinc oxide with, 915†
Carcinogenesis
chemical, in the hamster submaxillary gland, 568
DMBA, in rat submaxillary gland, effect of isoproterenol on, 893†
experimental oral, investigation of early lesion by exfoliative cytology, 966*
induced, in hamster cheek pouch, oral exfoliative cytology and histopathology during, 797†
oral, effect of sex hormones on, 893†
oral, epithelial lysosomes alteration during, 948*

* Abstracts. † IADR Abstracts. ‡ Annotations. § Titles.

Embryos
chick, facial malformation resulting from removal of neural crest, 822†
mouse, sulfated mucopolysaccharides during palate formation in, 822†
Emergence, tooth, in Maori children, 985*
EMMERING, T. E., 878†
EMOTO, H., 939*
Enamel
analysis of fluoride by use of liver esterase, 868†
calcifying of dog teeth, tetracycline incorporation in, 990§
chemical and visual changes caused by lactic and hydrofluoric acids in, 237
crystallites of permanent sound human, electromicroscopic observations on, 950†
demineralization in acid buffers, mechanism of, 987§
and dentin, human specific dielectrics for, 906†
and dentin, microstructure of, 1007
determination of CaF_2 in, 960*
determination of fluoride in layers of, from different surfaces of individual teeth, 958*
dissolution in acid buffers, mechanisms of, 868†
drops on metals, contact angle of, 927†, 993§
dry, in conservative and preventive dentistry, 967*
fluoride content of, in human deciduous teeth, 959*
formation, abnormal, subcutaneous sodium fluoride induced, microradiographic interpretation of, 50
fortification by extracts of silicate cements and fluoride-containing solutions, 865†
human, latent effects of gamma irradiation on, 763†
Hunter-Schreger bands in, 948*
mantle, number of prism bases on the inner and outer surface of the, 57
microporosity of the carious lesion of the, 945*
microradiographs, interpretation based on ultrastructural studies, 849†
mineralization, rat, by fluoride administration, microradiographic and histochemical studies on disturbances of, 938*
opacity, labial, of upper dental incisors, 945*
partially mineralized human, microscopic observations on, 958*
powders for experimental procedures, 304‡
proteins, studies in developing, 992§
rehardening characteristics of calcium phosphate solutions, factors influencing, 885†
remineralization with tetrasodium pyrophosphate, in vitro investigation, 886†
solubility with alkaline solution, stannous fluoride effect decrease on, 937*
solubility, effect of a stannous fluoride prophylaxis paste on, 168
solubility of New Zealand teeth, 986*
sound and white spot, treated with tin (II) and fluoride compounds, acid dissolution rate of, 867†
surface fluoride of teeth from the same mouth, 44
surface, intact, acquisition of fluoride from acid fluoride phosphate solutions, 869†
surfaces, effect of molybdenum salts and chlorides on fluoride uptake by, 844†
surfaces, softened, ability of human saliva to reharden, 886†
tubular, and dentin of osseous piscine teeth, historadiography of, 779†
X-ray emission microanalysis of Ca in developing, 959*
Endocrine dysfunction effects on dental development and maturation, 990§
Endodontic antifungal, nitro-methylfurfuryl ether as an, 988§
Endodontic antiseptic, antifungal evaluation of a new, 749†
Endodontic files and reamers, torsional properties of, 927†
Endodontic reamers, factors affecting failure of, 969*
Endodontic therapeutic agents, bacteriostatic activity and histopathological effects of, 744†
Endodontic therapeutics, evaluation of, 988§
Endotoxin and epinephrine, production of hemorrhagic necrosis in hamster cheek pouch by, 795†
End point of demineralization determination for histological purposes, 971*
ENGEL, M. B., 909†
ENGLANDER, H. R. 626‡, 864†
Enterococci, oral, isolation of bacteriophages from, 772†
Environmental and genetic effects on caries, separation of, 859†
Enzyme
activity analysis for the evaluation of the action of oral preparations, 684
activity of parotid saliva in mentally subnormal persons, 881†
Enzymes
oxidative, in hamster periodontal disease, histochemistry of, 846†
mechanisms for anti-inflammatory effect of, 873†
Enzymic studies of salivary glands, 941*
Epidemiological investigation of geographic tongue, 845†
Epidemiological study of peridontal disease in Trivandrum, India, 876†
Epinephrine and endotoxin, production of hemorrhagic necrosis in hamster cheek pouch by, 795†
Epithelial attachment, influence of age on position in gnotobiotic rat, 833†
Epithelial cell turnover in humans utilizing tritiated thymidine, 761†
Epithelial cells of cheek pouch of Chinese hamster, persistence of X-ray-induced chromosome lesions in, 762†
Epithelial elements of developing tooth, radioautographic analysis of behavior of, 823†
Epithelial lysosomes alteration during oral carcinogenesis, 948*
Epithelial migration during wound-healing in rat's oral mucosa, electron microscope study of, 978*
Epithelial root sheath, Hertwig's, histochemical studies of, 949*

Epithelial transplantation, autogenous, induction of lymphoepithelial lesions in hamsters by, 894†
Epithelium
gingival, human, mitotic activity and cell densities in, 789†
gingival, of marmoset, influence of route of administration of H^3-thymidine on determination of cell renewal in, 762†
gingival, in rhesus monkey, uptake of thymidine-H^3 by, 790†
gingival cuff, migration of cells in, 953*
gingival pattern of mitotic activity and cell densities in children's normal, 217
inner dental, specialized cells in the, 64
rat oral, electron-microscope studies of small cytoplasmic body in, 853†
Epoxy resin systems, investigation with dental application, 950*

Teaching dental radiology technique, aids for, 803†

* Abstracts. † IADR Abstracts. ‡ Annotations. § Titles.

Technique
of demonstrating oral sugar clearance, 712‡
for the preparation of ground sections, a simplified, 462‡
statistical, used in studying caries incidence in deciduous and permanent dentitions, 627‡
Techniques
inserting, finishing, polishing, acrylic fillings crazing relation tp, 187
in intraoral cytology, comparison study, 896†
Teeth
age, degree of etching as a function of the, 629‡
anterior, pressor sensory thresholds of, 962*
and bone, undecalcified, preparation of large specimens of for sectioning at a 4-μ thickness, 131
changes of pigs held at reduced weights by undernourishment, 972*
deciduous human, fluoride content of dentin and enamel in, 959*
erupted, nerve distribution differences between non-erupted and, 406
ethoxylene resin, photoelastic tests with, 967*
frozen undecalcified serial sections of, 973*
of growing albino mice effects of estrogen and parathyroid extract administration upon, 331
non-erupted, nerve distribution differences between erupted and, 406
phosphorescence, neo-tetrazolium chloride effects on, 659
rats, comparison of two methods of quantitative determination of bacteria associated with, 717‡
replanted formalin-fixed, resorption pattern of, 990§
Temperatures, oral and burning zone, in normal and reversed cigarette smoking, 797†
Temporal muscle of dogs, effect of masticatory muscle imbalance on pattern of activity in, 787†
Temporomandibular joint
blood supply, 224
of guinea pigs, blood supply and innervation of the, 812†
human, prenatal development, 785†
innervation and lateral pterygoid muscle in animals, 947*
in jaw movement, role of sensory information from the, 813†
in patients with rheumatoid arthritis, studies of, 990§
radiographs, reliability of measurements obtained from radiographs produced by the Updegrave technique of, 989§
rat, effect of hydrocortisone and fluoride on, 786†
and related structures, prenatal development of the human, 990§
Temporomandibular-joint's sensory mechanisms controlling jaw muscles' activities, 150‡
Ten Cate, A. R., 949*
Tensile specimen design for dental casting gold alloys, 918†
Tension
measurements in gingival tissue, in vivo oxygen, 708
oxygen, gingival, effect of dinitrophenol on, 909†
Tensional testing methods, evaluation of retention of bridge abutment castings using, 919†, 987§
Teratogenic effect of the steroid nucleus in rat, 548
Terkla, L. G., 921†
Terris, M., 798†
Terry, I. A., 800†
Testicular alterations in mice following salivary gland removal, 869†
Testosterone-induced changes in submandibular gland of female hamster, 769†
Teteruck, W. R., 916†
Tetracycline
antibiotics and tooth discoloration, 780†
fluorescence, analysis of tooth eruption and alveolar bone growth utilizing, 887†
incorporation in calcifying enamel of dog teeth, 990§
in teeth and bone, fluorescence tracing of, 991§
uptake nature and effect in dental hard tissues, 753†
uptake by synthetic and biological apatites, 961*
Tetracycline-induced hypoplastic and hypomineralized defects in rat incisor enamel, fine structure of, 850†
Tetracyclines, effects on teeth and bones, 847†
Tetrasodium pyrophosphate, in vitro investigation of enamel remineralization with, 886†
Tetrazolium, neo-, chloride, effects on phosphorescence of teeth, 887†
Th-228, Ra-226, Ra-228, gingival ulceration in beagles induced by, 35
Therapeutic agents, endodontic, bacteriostic activity and histopathological effects of, 744†
Thermal denaturation of rabbit-skin collagen, 845†
Thermogravimetric behavior of lyophilized human parotid saliva from "caries-immune" and caries-active individuals, 767†
Thomas, D. W., 839†
Thomas, N. R., 947*
Thomassen, P. R., 346
Thonard, J. C., 819†, 912†
Threshold, oral sensory, determination methods, 833†
Thromboplastic activity of human saliva in patients under prolonged anticoagulation therapy, 323
Thromboplastic factors, salivary, fractionation and isolation of, 883†
Thyme-nucleic acid on growth, effect of, 988§
Thymidine
H^3-, route of administration of, influence on determination of cell renewal in gingival epithelium of marmoset, 762†
H^3-, uptake by gingival epithelium in rhesus monkey, 790†
tritiated, demonstration of odontoblast precursor cell by, 810†
tritiated, epithelial cell turnover in humans utilizing, 761†
tritiated, labeling in formocresol-injured muscle, 770†
tritium-labeled, used to study cell activity in developing TMJ and during tooth movement, 992§

Thyroid
hormone and growth in hypophysectomized rats, 984*
imbalance, salivary protein composition and submandibular gland size in, 768†
Thyroid-parathyroid complex of the *ia* strain of rats, 164†
Thyroparathyroidectomized rats, abnormalities of incisor teeth, 983*
Tibiae and mandibular condyles of scorbutic guinea pigs, healing sequences in, 858†
Tin (II) and fluoride compounds, acid dissolution rate of sound and white spot enamel treated with, 867†
Tin-silver alloys, reaction with mercury, 923†
Tissue
nerve, muscle, and connective, binding of procaine and lidocaine, by, 909†
oral, diurnal volume changes, and fit of dentures, 781†
pressure, dental pulp, and systemic arterial blood pressure, relation between, 805†
protection and ridge extension, a new method for, 993§
reactions to a fluid dimethyl polysiloxane, 988§
reactions to restorative materials, 807†
soft and hard serum ascorbic acid levels of guinea pigs following wounding of, 433
Tissue, connective
cells, labeled, studies on the location of, 988§
of dental pulp in ascorbic acid-deficient animals, ultrastructure modification of, 987§
effect of dilantin sodium on, 847†
growing into sponge implants, light- and electron-microscope observations on, 852†
normal, of dental pulp, ultrastructure of, 987§
response to altered collagens and bone implants, 809†
response, rat, to bridge pontic materials, 899†, 991§
Tissue culture
cells, growth of, effect of stainless steel band material on, 871†
effect of 5-fluorouracil on normal and radiated human gingival fibroblast-like cells in, 894†
new applications of silicone in organ growth in, 809†
parathyroid extract-induced bone resorption in, enhancement by heparin, 830†
Tissues
calcified, growing, lead acetate as marker of, 776†
calcified, lipid components of, 841†
calcified, phosphorescence of, 775†
circumoral, soft, behavior in two groups of children, 968*
dental hard, nature and effect of tetracycline uptake in, 753†
gingival, inflamed, the plasma cell in, 963*
hard, octacalcium phosphate role in formation of, 751†
odontogenic, mouse, induction of bone in vivo across millipore filters by, 829†
periodontal, aconitase and fumarase activity in, 495
Tocopherol-deficient diet, effects on oral and paraoral structures of rat, 771†
Todo, H., 459‡
Tolerance, glucose, in patients with intraoral symptoms, 843†
Toluidine blue staining of dentin, 972*
Tomato yeast agar with Rogosa's medium for lactobacillus counts, comparison of, 713‡
Tonge, C. H., 972*
Tongue
and cheek forces, frequency of swallowing and measurement of accompanying, 833†
effect of chronic dihydrotachysterol overdosage on, 795†
geographic, epidemiological investigation of, 845†
human, sensory innervation of, 778†
and lip pressures during speech and involuntary swallowing, 906†
thrusters deglutition frequency compared to normal swallowers, 363
Tonous, T., 941*
Tonzetich, J., 860†
Tooth
enamel, fluoride-containing dentifrices' effect on, 978*
enamel powders for experimental procedures, 304‡
eruption and alveolar bone growth, collagen maturation role, in, 947*
germ cultivation, respiration and glycolysis in cultivation of, and the effect of oxygen tension upon them, 940*
incisor, H^3-thymidine-labeled cells distribution in, 970*
mineral, crystal chemistry of hydroxyapatite relation to, 750†
physiologic, migration of, 610
prepain sensation elicited by electrical stimulation, 467
pulp blood flow, bleeding rate as an indication of, 991§
reactions to noxious stimulation of chemical reagents, temperature, and pressure variations, 942*
recovery time factor and its relation to mastication, 962*
sections, thin, controlled chemical attack in, 956*
size in marmosets, analysis of, 834†
size sex difference, 306‡
structure, cracks induced by rotary-cutting instruments and their relationship to dentin, 925†
surface under the electron microscope, 961*
Toothbrush
electric, clinical evaluation, 801†
electric and manual, comparative effectiveness, 801†
orbital motion electric, comparison with hand brush, 987§
types, electric, effects on induction of human gingival abrasion, 794†
Toothbrushes, electric, cleansing efficiency of, 781†
Toothbrushing
abrasion on acrylic resin veneer surfaces, 800†
permissive, powdered, altered gingival health from, 800†

* Abstracts. † IADR Abstracts. ‡ Annotations. § Titles.

reciprocating action automatic, simulated gingival margin cleaning and brush angle abrasion, 800†
in thirteen-year-old children, 969*
Topical application of stannous fluoride, 30-second technique for, 781†
Topical or iontophoretic fluoride, rat molar acid solubility after treatment with, 867†
Topically applied stannous fluoride, intraoral transfer of, 78
Tori, palatal and mandibular, in the Negro, 798†
Torsional properties of endodontic files and reamers, 927†
Torus mandibularus and palatinus, inheritance of, 159
TOSSAS, A., 812†, 813†
TOTO, P. D., 151‡, 759†, 988§
Toxicity
of dental implant materials toward chick chorioallantoic membranes, 912†
of *Lactobacillus casei,* 892†
Toxins, liver, response of rat submaxillary gland to, 768†
Trace element determination by nuclear reactions, activation analysis, 992§
TRACY, W. E., 820†
Transfer, placental, of maternally stored Ca^{45} to fetal oral tissue, 848†
Transplantation
autogenous epithelial, induction of lymphoepithelial lesions in hamsters by, 894†
and reimplantation of teeth, 824†
tooth, immunological considerations in, 895†
tooth, role of immunology in, 870†
Transplants, bone marrow, hemopoietic, effect on healing of maxillofacial osseous defects, 827†
Transversal and early measurement of amalgam expansion, 194
Transverse strength of amalgam, 121
TRAUTZ, O. R., 750†, 751†, 775†
Treatment
anterior tooth, patterns in relation to tooth site and patient age, 802†
environment, physiological recording in, 910†
room procedures, child patient responses to, 898†
sampling to survey need for dental, 982*
Treponema microdentium, requirement for cocarboxylase, isobutyrate, and polyamines, 904
TRIFFITT, J. T., 957*
Trigeminal ganglion, cell types in, 784†
Trigeminal mesencephalic nucleus cells in unanesthetized cats, electrical activity of, 785†
Triphospho-pyridinenucleotide reductases in human gingiva, cytochemical demonstration and metabolic significance of reduced diphosphopyridine nucleotide and, 92
Tritiated thymidine
demonstration of odontoblast precursor cell by, 810†
epithelial cell turnover in humans utilizing, 761†
influence of route of administration on determination of cell renewal in gingival epithelium of marmoset, 762†
labeled cells distribution in rat's incisor teeth, 970*
labeling in formocresol-injured muscle, 770†
uptake by gingival epithelium in rhesus monkey, 790†
Tritium-labeled glycine distribution in rat incisor cells, 970*
Tritium-labeled thymidine used to study cell activity in developing TMJ and during tooth movement, 992§
Trivandrum, India, epidemiological study of periodontal disease in, 876†
Tryptases in salivary glands of rodents, histochemical demonstration of locales of, 879†, 990§
Tryptophan, fluorometric demonstration of in dentin and bone protein, 276
TSUKAMOTO, Y., 495
TSUNEMITSU, A., 495, 942*
TUBA, J., 858†
